REQUEST TO USE COMPUTER READABLE FORMAT FROM  
PRIOR APPLICATION AND STATEMENT UNDER 37 CFR §1.821

Sir:

A Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures was received from the Patent Office, and a copy of that Notice is attached herewith. The Notice indicates that the "application is objected to because it contains a data file on compact disc, which is not identified in the paper portion of the specification with a listing of all of the files contained on the disc. When portions of an application are contained on a compact disc, the paper portion of the specification must identify the compact disc(s) and list the files including name, file size, and creation date on each of the compact discs (see 37 CFR 1.52(e))."

It is respectfully requested that the computer readable format of patent application Serial No. 10/031,636 entitled "Isolation of Nucleic Acid," filed April 29, 2002 by the applicant, Andrew S. Goldsborough, also be used as the computer readable format for the subject application. I hereby certify that the sequence listing in the subject application and the sequence listing in application Serial No. 10/031,636 contain identical sequence information and that the paper and computer readable copies contain the same information. Applicant respectfully asserts that the sequence listing on paper was submitted when the application was filed. Because Applicant is requesting that the computer readable format for the subject application be used from the parent application, the CD-ROMs submitted when the subject application was filed should not become part of the permanent Patent Office records. Accordingly, the specification has not been amended to contain an incorporation-by-reference of the material on the CD-ROMs.

Respectfully submitted,

Frank C. Eisenschenk, Ph.D.
